

# ON-LINE Computer Services Inc

## Restaurant POS Solutions

### Computerized Restaurant POS

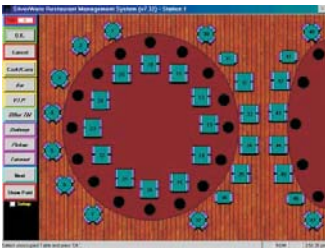

Successful restaurants require excellent menus, an organized kitchen, efficient servers and effective management. Computerized Point of Sale (POS) solutions can make the difference between an efficient, well-run, profitable restaurant and a restaurant which may or may not be around next month. Silverware Restaurant POS software running on hardware installed and supported by ON-LINE Computer Services provides a seamless, one-stop solution to your restaurant technology infrastructure needs.

SilverWare Cafeteria POS

### Silverware POS Software

Markham, Ontario based Forsys Corporation developed Silverware Restaurant POS Software in 1994. Since then, from a small two person startup with a couple of installations, Forsys has grown to be a publicly traded company with some 4,500 installations throughout North America. Starting with its core restaurant management software Silverware has developed modules to address the full range of restaurant infrastructure requirements. Modules include Table Service, Quick Service, Credit Card Authorization, Reservation System, Inventory, Labour Scheduling, Pool Table Billing, Kitchen Monitor, Multi-Store Consolidation, Hotel Interface, "Azbar" Bar Control, Server Biometric ID Module and General Ledger Interface in a highly customizable, floor plan based "touch-screen" interface system. Silverware software addresses virtually all styles of restaurant, from walk-in "Quick Service" to reservation based full service restaurants, from cafeterias to bars – with or without pool tables!

SilverWare Table Manager

### Silverware in Atlantic Canada

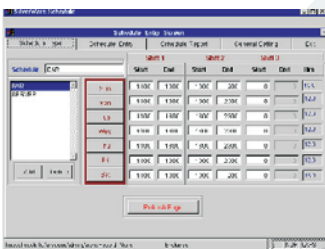

Until recently Silverware has had a very quiet presence in Atlantic Canada. With minimal representation Silverware has been installed in some 11 restaurants. In March 2002 ON-LINE Computer Services became an Authorized Business Partner and dealer for Silverware software solutions. Following extensive training at Forsys's head office in Toronto ON-LINE is ready to deliver Silverware POS solutions to restaurants throughout the four provinces of Canada's East Coast.

### ON-LINE Computer Services

ON-LINE Computer Services is a Halifax based, privately owned business providing technology solutions since 1989. The business has grown primarily as a result of satisfied client referrals. ON-LINE has significant expertise in designing, installing and supporting networks. ON-LINE's abilities in the areas of Internet connectivity, wireless networking, virtual private networks and remote access have developed in step with the Internet. Utilizing these technologies enables ON-LINE to provide support from its downtown Halifax location to sites throughout the region.

SilverWare Labour Scheduler

ON-LINE's recent commitment to Silverware Restaurant POS signifies a new level of involvement with the restaurant sector in Atlantic Canada. ON-LINE has supported restaurants in the past including such establishments as White Point Beach Lodge, the Victory Arms Pub in Halifax and the recently opened Waterfront Warehouse in Halifax.

To effectively serve clients ON-LINE has experienced, highly skilled support personnel available at its office and repair facility in Halifax providing quotation and sales information, hardware configuration and repair services, and, operating system and application software installation and support. ON-LINE specializes in on-site hardware, software and network support. The office is open normal business hours with after hours contact numbers and support provided as required.
